

Position: External Study Coordinator

Duration: Permanent, Full-time

Location: 8540 Baxter Place, Burnaby, BC

Posting Date: May 6, 2010

Company Description

Inimex is developing a novel class of innate immune modulators - medicines that selectively activate innate defences without causing inflammation. Inimex medicines have the potential for broad application as therapeutic agents for infectious disease and for inflammatory disease. Our success is the direct result of teamwork and our common vision.

The Ideal Candidate

You have the ability to learn quickly and the maturity and judgment to know when to ask questions. You are thorough, well organized and able to multi-task and prioritize duties effectively. You are also a strong team player with the written and oral communication skills needed to work closely with all members of the scientific research team. Sound analytical skills and the ability to create, implement and troubleshoot study protocols are also essential. You enjoy a fast-paced environment and the challenge of working on many different projects simultaneously.

Position Description

The successful candidate will work closely with Inimex' research team to arrange the testing of Inimex' compounds in outsourced efficacy models. The candidate will be responsible for identifying vendors capable of performing needed studies, coordinating studies with the vendor and analyzing and interpreting the resultant data.

Requirements

- Minimum B.Sc. in pharmacology, immunology, infectious disease or related field with 5 years relevant industry experience or M.Sc. with 3 years relevant industry experience.
- Expertise in drug efficacy studies is required and previous hands-on work experience is an asset.
- Experience with infection or inflammation models is an asset.
- Strong written and oral communication skills in the English language.
- Strong organizational skills
